Lot Size	1.00 acres

### DESCRIPTION

This estate quality property has always been dressed to impress, but this picture perfect property has recently gone from good to great. So if you've seen it before, you'll want to see it again. From the moment the remotely controlled gate swings open, it's obvious that this one is special. As you drive the approximate 250 feet down the paved palm-lined drive, the care and detail that went into the carefully crafted lawn becomes immediately apparent. The addition of an above ground pool has added a finishing recreational touch to the huge outdoor lanai area located just off an additional enclosed rec room.

What was once a small functional kitchen has blossomed into an upscale beauty with all the bells and whistles; granite countertops, stainless appliances; including top-of-the-line "French Door" refrigerator, brand new custom cabinetry, and custom lighting. The central island complete with glass front doors on the bar overlooks the dining area and family room. The great room flows into, but is nicely separated from, the rec room/interior enclosed lanai. With generous spaces and soaring ceilings, it all comes together to create a space where memories are bound to be made.

After long days, retreat to the master bedroom with private lanai. Four generously sized bedrooms are located down an extra-wide four foot central hallway. Located just across the center breezeway is an oversized two car garage, additional 3/4 bath and a workshop that would easily serve as an additional bedroom, office or could be a self-contained unit. Two additional rear lanais complete a package that's hard to beat at any price!
